

SILK

SILK is a modern, sleek full grain leather with a magnificent silky touch. Versatile in its many possible applications, but particularly appealing to the dynamic designers of cosmopolitan and contemporary environments. SILK has a very natural finish where the beautiful, authentic signs of life (such as fat stripes, healed wounds, and insect bites) are left to enhance its overall appeal.

Please note that colour and grain variations are possible due to the natural character of an aniline leather like SILK.

Chrome tanned and produced without the use of PCP and CFC which are damaging to the environment.

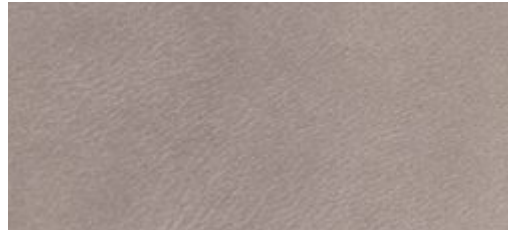

The leather complies with all limits and standards for chrome VI and the REACH declaration.

Average size per hide: 4,5 sqm.

Please note that the colours and grain shown are for guidance only. There may be differences in the colour shade and grain of the actual hide compared to the photo.
