

SEVILLA

The natural grain of the leather creates SEVILLA's characteristically soft and subtle feel. The light corrected semi aniline leather has a light finish on the surface. And SEVILLA is suitable for soft upholstery in the form of sofas, chairs and cushions for both the private and contract market. The characteristics and the natural feeling make the leather appear and feel very exclusive.

SEVILLA is chrome-tanned and produced without the use of PCP and CFC.

*Notice that colours and grain is a guideline. There may be a colour and grain difference from the shown picture to the hide you receive, due to the variation in colour appearances on screens.

Approx. size: 5,2 m².
