MORE SOURCE SEPARATION

# ARE YOU READY?

Source separation and recycling is an important part of the circular economy, and towards a greener future. By recycling, reusing, and sorting our waste, every company can contribute to this goal.

Since 2013, Cube Design has produced and delivered recycling stations for workplaces – developed to make source separation easy and hygienic without compromising on design. Our stations will meet your needs for a functional source separation system and a high-quality furniture piece in a beautiful Danish design.

# Compact laminate

All our recycling stations are made with a top plate of 12 mm compact laminate, which is robust, sturdy, and easy to clean.

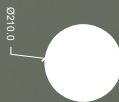

## New color!

Top plate now available in Platinum Grey U12115

## Make it your own

Looking for a recycling station that fits your individual needs? Our recycling stations have a flexible design. Choose between different top carvings, accessories, colors and surfaces.

# FSC® certified!

At Cube Design it is important for us to take good care of the environment. That's why all our recycling stations are FSC certified – this applies whether you choose our ready-made solutions or design your own recycling station. FSC is your assurance that the wood material comes from responsibly managed forests.

Need  
**coffee?**

News! Cube Design is launching Quadro coffee station – a practical piece of furniture in an exclusive design. Ideal for the modern office environment.
